Inventive Step (IS) Claims NONE Claims 1-69 Industrial Applicability (IA) Claims 1-69	statement			
Inventive Step (IS) Claims Claims NONE NONE Tridustrial Applicability (IA) Claims Claims Claims Claims Industrial Applicability (IA) Claims Claims Claims Claims Claims Claims I-62 NONE NONE NONE Citations and explanations (Rule 70.7) Claims 1-69 lack an inventive step under PCT Article \$3(\$) as being obvious over Giordano et al. (6,004,749) in view of Spinella (8,566,541). Giordano et al. discloses method for identifying compounds affecting RNA/RNA binding protein interactions and for identifying compounds that modulated such interactions which could be useful for regulating the expression of RNA molecules of interest such interactions are facilitated in a binding solution. The binding solution contains one or more RNA molecules and buffer components. RNA molecules can be part of a crude cellular or nuclear extract. RNA molecules can also be made by in vitro transcription or by direct synthesis. Detection of interactions between RNA binding proteins and RNA molecules can be facilitated by attaching a detectable label to the RNA molecule. (see columns +1+). Suitable pharmaceutical vehicles such as liposome can be used for administration. (columns 16-17). Spinella et al. disclose method for rapidly screening member compounds of a combinatorial library for potential biological activity, in which the protein may be immobilized on a solid support in such way as to allow binding of the binding partner. (see claims). It would have been obvious at the time the invention was made to immobilized the test compound on solid support as taught by Spinella et al. The motivation is that after the interaction the immobilized complex may be washed to eliminate other components and the complex can be eluted to produce an enriched population of candidate compounds (Spinella column 11). Applicants have the arguments that the references do not suggest the instant invention because the feature upon which applicant relies are not recited in the rejected claim(s).
